

Science

Year 10 and 11

These tasks are set for the week beginning 27th April for science.

If you are able to complete the answers on a document and e-mail it to me, I will mark it and keep it for your exercise books. Remember you can still use the Bitesize links to enhance your knowledge further.

Just do as many as you feel you can.

Evolution and Natural Selection

Where did humans come from?

- 1) Read pages 18 and 19 of textbook which explains evolution
- 2) Answer questions 1-5 using the information to help you.
Above and beyond – complete F1 using a flow chart.
- 3) Complete worksheets B1h.2 and B1h.4

Research task

In 1974 scientists found fossilised remains of an extinct human-like species. They named her Lucy. Find out at least 4 facts about this discovery and what they believe her species was like. You could do this as a power-point.

Well done!

There is a quick science quiz on the website with some random facts. Have a go, correct answers will be entered in a prize draw.

Australopithecus
