

## Science

### Edge groups – Key stage 3

This is the start of our new unit for this half term. Animal reproduction.

These tasks are set for the week beginning 27<sup>th</sup> April for science. If you are able to complete the answers on a document and e-mail it to me, I will mark it and keep it for your exercise books. Remember you can still use the bitesize links to enhance your knowledge further.

Just do as many as you feel you can.

### Sexual reproduction in animals

#### How do different animals reproduce?

- 1) Read pages 26-27 of textbook which explains animal sexual reproduction.
- 2) Answer questions 1-5 using the information to help you.
- 3) Complete worksheet ba2; animal sexual reproduction  
Extension work-outstanding effort  
Complete questions 6,7 and 8 from the textbook pages.

#### Research task

Find out about an animal that is at risk of extinction. Give at least 5 facts about this animal such as where it lives, how many are left etc. You could do this as a power-point.

Well done!

There is a quick science quiz on the website with some random facts. Have a go, correct answers will be entered in a prize draw.

Snapper fish
